

KS3 Curriculum Map

All pupils in Years 7 and 8 design and/or make products in our Food, Textiles, Graphics, Resistant Materials and Systems and Control /Electronics areas. The order in which pupils work depends upon the 'Q' group that they are in.

Pupils in Year 9 work in two chosen areas as well as completing a common module encompassing all areas.

Click on the individual specialism links to see what the pupils do in each module in each year and the 2012/13 Rotation schedule to see the dates for this academic year and the order in which the modules are completed by each group.
